

MINI PAK'R™

Air Cushion Machine

Make Your Own Packaging Supplies with The MINI PAK'R™ Air Cushion Machine

Save money, protect fragile items and eliminate packing materials storage issues with the MINI PAK'R air cushion machine.

Small and smart, the MINI PAK'R can make six different types of air cushions to package whatever you're shipping better than bubble wrapping material or packing peanuts.

Ultimate Packaging Protection: Six Different Air Cushions, No Popping

This one little machine makes industrial-strength packaging supplies, when and where you need them. With the NOVUS® air cushions made with the MINI PAK'R, air moves between pockets instead of popping, eliminating deflated bubbles and potential related shipping damages.

The Best Way to Package Fragile and Valuable Items

The MINI PAK'R is ideal for retailers, manufacturers and distributors:

- Electronics
- Medical Devices
- Auto, Marine, Aircraft and Motorcycle Parts
- Retail Stores (Brick & Mortar, internet)
- Pack and Ship Stores
- Lighting and home furnishings
- Artists, Potters, Sculptors and Galleries
- eBay Shippers

You get bubble materials that cost less, protect better and take up a fraction of the space of traditional packaging supplies.

A Better Way To Package is Here

• Saves Money and Space

Save money by using less packaging materials with the MINI PAK'R

Save money with lower damage claims and potential lower shipping costs with lighter weight air cushions

One small roll of Novus Double Cushion® film equals seven 14 cubic foot bags of peanuts

One small roll of Quilt-Air® large film equals 1 and 1/3 rolls of 1/2" X 48" X 250' bubble wrap

• Convenient

Make packaging supplies whenever you need them.

• Protects

Air moves between cushions so no popping and no damage.

• Versatile

Six different air cushions are made with this one machine.

Make Six Different Air Cushions with One Compact Machine

Packaging for All Your Shipping Needs

NOVUS® Supertube

Flexible air tube that folds in two directions: Use to line boxes, wrap corners or fold to hold your products in place. Perfect to wrap pottery, fragile glassware, electronics and other breakable items.

NOVUS® Double Cushion

Large flexible air cushion: Use to top fill and side fill a carton quickly with less packing material. Superior cushioning keeps items from moving in the box. Ideal for books & pre-boxed items.

NOVUS® Quilt Large

Large bubble wrapping material: Easy cushioning solution to protect sculptures, large dishware or glassware, candles, lighting fixtures, musical equipment and other medium to large items.

NOVUS® Quilt Small

Small bubble wrapping material: Ideal for protecting small to medium decorative and breakable items. Can be used as interweaving cushioning between dishware and other flat surfaces or as surface protection to prevent scratches.

CELL-O® 4x8 cushion

Small air pillow: Designed to keep small boxed items from moving in the box. Ideal for auto/motorcycle parts, sporting goods, personal care items or other less fragile items.

CELL-O® 8x8 cushion

Medium air pillow: Use to fill medium to large spaces in cartons. Ideal for hardware/tools, machined parts, shoes, household items and other less fragile products.

Simple

MINI PAK'R automatically sets air pressure and sealing temperature.

Compact

Sits on table or mounts on wall.

Practically maintenance free

Eco-Friendly

Reusable and recyclable
